2. Areas of Greatest Need

Map Submission

The maps generated at the HUD NSP3 Mapping Tool for Preparing Action Plan website are included as Attachment A.

Data Sources Used to Determine Areas of Greatest Need

Describe the data sources used to determine the areas of greatest need.

Response: Areas of greatest need will be determined using data from the HUD Foreclosure Need Website at <http://www.huduser.org/portal/datasets/NSP.html>. In order to comply with the NSP3 requirement that funds be expended in the highest needs census tracts and block groups, the County of Tulare will not spend any NSP3 funds in areas with a needs score of less than 17. Using the minimum need score of 17 will allow for funds to be directed to those areas with the highest percentage of home foreclosures, highest percentage of homes financed by subprime mortgage related loans and likely to face a significant rise in the rate of home foreclosures.

Determination of Areas of Greatest Need and Applicable Tiers

Describe how the areas of greatest need were established and whether a tiered approach is being utilized to determine the distribution of funding.

Response:

NSP3 requires funds to be focused on geographically contiguous areas in such a way that the selected target area experiences the highest impact possible. Additionally, HUD requires that the need score of the targeted area be at least 17. Targeted neighborhoods must be predominantly comprised of low-, moderate-, and middle-income (LMMI) households, which is defined as households earning at or below 120% of Area Median Income (AMI) annually. The County of Tulare will use a minimum of 25% of its NSP3 allocation for permanent housing for households with incomes that do not exceed 50% of AMI.

CDBG Activity or Activities	New construction of rental housing
National Objective	25% Set-Aside
Activity Description	<p>When selecting its NSP3 target area, the County of Tulare gave preference to the construction of an 80-unit multifamily rental project located in the community of Ivanhoe, entitled the Ivanhoe Family Apartments. The County of Tulare has partnered with the Corporation for Better Housing (CBH) for the construction of this project. The Ivanhoe Family Apartments is a new construction project that will have 5 two-story garden style walk-up buildings, housing 80 rental units reserved for families with incomes ranging from 30% to 50% of the Area Median Income (AMI). There will be 16 one-bedroom units, 32 two-bedroom units, and 32 three-bedroom units. At full capacity, the apartments will house 80 families and up to 432 people. The proposed site is less than one mile from an elementary school, shopping, employment, and transportation. A grocery store is within 100 yards of the project. The project developer has committed to hiring targeted income group individuals to manage and oversee day-to-day operation and maintenance of the complex. CBH will establish a waiting list of potential tenants before construction is complete. They will ensure that the tenants are income-qualified and the meet the requirements of tenancy. Preference will be given to those tenants who meet qualifications on a first-come-first-served basis.</p> <p>CBH is a 501 (c)(3) non-profit organization that was established in 1995 with the purpose of providing low income families with safe, quality, affordable housing, and coordinated access to social service programs. Since its founding, CBH has completed 40 developments totaling over 3,000 units. The community of Ivanhoe is an extremely blighted and economically disadvantaged community. Further, Ivanhoe has a severe lack of diversified affordable housing. There have been no new apartments built in Ivanhoe since 1992 and the rate of residential overcrowding is 38.7%.</p> <p>CBH builds energy efficient and environmentally friendly developments. CBH utilizes the NSP Green Housing Guide and other nationally recognized programs, such as the Department of Energy's Energy Star for Homes, Green Communities program by the Enterprise Community Partners and LEED for Homes program by the United States Green Building Council as benchmarks in development design and implementation. Green Construction and Development Technologies include: Integrated design approach that demonstrates involvement of the entire development team, careful site selection ensuring close proximity to public transportation and services, preservation of existing trees and vegetation pursuant to an arborist study, installation of low-flow plumbing fixtures, installation of Energy</p>

	Star [®] lighting systems and appliances, installation of recycled carpeting and carpet pads, installation of recycled acoustical tiles, installation of energy efficient, high performance windows and doors, insulation of hot water lines, and use of healthy cleaning materials during construction and operations phases. Recycling programs will be incorporated both during construction and operation to minimize impacts to the environment and promote reuse.

The NSP3 mapping tool now provides a summary NSP3 score for all projects drawn. Click on "View Projects", which will list all of the projects (target areas) that have data calculated. It shows the NSP3 score for each target area along with the total estimated housing units in that area. At the bottom of the list is a sum of all housing units in all target areas and the NSP3 score for all target areas drawn. Grantees are advised to know their state minimum and if the summary score is less than the state minimum the grantee should delete, add, or revise target areas. Note that if you delete or add, the tool only recalculates after you close the "View Projects" box and reopen it. HUD also advises grantees to think carefully about the size of their target areas in total. If those target areas have a very large number of total housing units relative to the dollars available, HUD will likely ask that the grantee reduce the number and/or size of their target areas.
